To

Dr P Gopi,

Director of Agriculture

Agriculture Cooperation Dept. Govt. of Telangana

Hyderabad

Sir,

Most respectfully I submit to you that I am the President, Plant Protection Association of India working for the cause of Agricultural Sciences & Farming community in general and plant protection in particular in the last over 50 years since PPAI's inception in 1972.

We would like to draw your kind attention to a praise worthy action of the Department of Agriculture, Ranga Reddy District conducting a raid very recently in a residential house of LB Nagar, seizing huge quantity of counterfeit pesticides manufactured in the names of several reputed companies including Syngenta, FMC, Corteva, Rallies, Indofil, PI Industries, Bayer and Dhanuka etc.

We have also come to know that the Agricultural Officer of the area collected samples and filed a complaint with the LB Nagar Police Station. Employees of one of these companies have also confirmed that the material found in the premises is counterfeit.

Despite all the incriminating evidence the LB Nagar Police did not register an FIR imposing the right IPC sections and sections of Trademark Act in the FIR.

As a responsible society working for the farming community as well as the scientific community, I would like you to do all that is needful to initiate action against these criminals harming the very poor producer farmers directly and the health and security of the consumers at large.

Millions of Indian farmers are spraying fake /counterfeit pesticides that are in the name of highly reputed manufacturers on to their fields, contaminating soil, cutting crop yields and putting both food security and human health at risk in the country of 1.43 billion people. We are encountering the instances of spurious processed foods also along with use of spurious pesticides enhancing the health risk to the consumers. Chronic exposure to pesticides can lead to depression which is a factor in suicides. Spurious pesticides that can't metabolize to harmless products can lead to fatal cancerous situations.

I also as an individual citizen and consumer of the vegetables, pulses and food grains bearing the brunt of consequences of spurious pesticide use, request you to initiate action and advise the police to register rightful FIRs under IPC 420, 421, 481, 482, tax evasion, insecticide act etc.

I on behalf of the PPAI look forward to your kind action in the interest of the public health and safety of the consumers.

Yours Sincerely

(B Sarath Babu)

President, Plant Protection Association of India & Former Head, ICAR-NBPGR, Hyderabad
