

Plant Protection Association of India (PPAI)

Cultivating Knowledge, Protecting Life and Nurturing Future

Plant Protection Association of India (PPAI)

PJTAU Campus, Rajendranagar, Hyderabad - 500 030

Email: ppaihyd@gmail.com; Website: <https://www.ppaiorg.in>

For Over Five Decades, Leading the Way in Plant Health and Agricultural Sustainability

The Plant Protection Association of India (PPAI) is more than a society; it's a movement. Since its establishment in 1972, we've been the bedrock of scientific excellence and practical empowerment, safeguarding India's green wealth and securing the future of our food systems. Join us as we build capacity, foster innovation, and champion a sustainable agricultural tomorrow.

Our Journey, Legacy & Vision

Brief History & Evolution

The Plant Protection Association of India (PPAI) is a scientific, non-profit organization, registered under the Andhra Pradesh (Telangana Area) Public Societies Registration Act, 1350 Fasli (Act I of 1350 F.) on **December 4th, 1972**. From its beginnings at the Central Plant Protection Training Institute, PPAI established its permanent headquarters in Hyderabad. In 1998, the office moved to ICAR – National Bureau of Plant Genetic Resources, where it operated until recently. A significant milestone was achieved in 2017 with permission to construct our **own building within the campus of Professor Jayashankar Telangana Agricultural University (PJTU)**, Rajendranagar, Hyderabad. Our new premises turned fully operational during **January 2025**, marking a new era of expanded capabilities.

Aims and Objectives of the Association

Since its inception, PPAI has been driven by core aspirations to advance plant protection research and development, disseminate knowledge, and link plant protection professionals. These objectives have continually evolved to align with advances in R&D, technologies, and infrastructure growth. Our current objectives are:

- To advance the cause of plant protection by encouraging and promoting research, education and extension
- To provide a forum for dissemination of information related to plant protection through a journal
- To bring about exchange of views and ideas on plant protection by organizing lectures, discussions, seminars, symposia and capacity building programmes for different stakeholders
- To maintain a vital link between plant protection workers across India
- To involve in activities that advance and facilitate the adoption of plant protection techniques developed by the scientific community.

Fifty Three Years of Progress

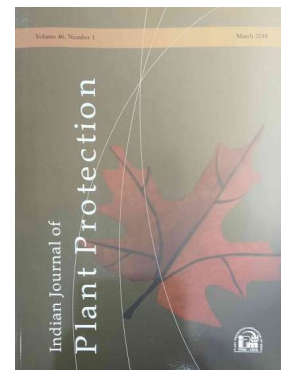

During 1972-2025, PPAI has transformed from a small, specialized group to a full-fledged Association of National repute, uniquely devoted to advancing plant protection. Managed by a professional team of scientists and support staff, we have built a strong network of plant protection workers. Today, our membership includes **425 life members, over 150 regular members, and 100 Institutional memberships**, with affiliations spanning ICAR institutes, State Agricultural Universities, Directorate of Plant Protection Quarantine & Storage, National Institute of Plant Health Management, and private sector agencies. We operate strictly as per society guidelines through regularly elected Executive Councils.

Our Pillars of Contribution & Recognizing Excellence

Key Activities of the Association

PPAI works for a diverse community of global scientists, providing credible information, advocating knowledge exchange among public, policymakers, and the scientific community, and promoting opportunities for scientific communication and professional development.

- **Publications:**
 - **Indian Journal of Plant Protection (IJPP):** Since 1973, IJPP has been the foremost activity. Published quarterly (March, June, September, December), it has completed **50 volumes** and is recognized as a leading national journal in plant protection. It is indexed/abstracted in Bioscience, Chemical Abstracts, Review of Applied Entomology, Review of Plant Pathology, other CAB abstracts, and AGRINDEX of FAO, and holds a standard NAAS rating.
 - **Books, Manuals, Monographs & Proceedings:** PPAI has published numerous valuable compilations of advances in plant protection for the benefit of diverse stakeholders,

including brochures and booklets for students, researchers, state department personnel, and farmers.

- **Conferences, Workshops & Symposia:** PPAI regularly organizes technical events, fostering collaboration among plant protection workers from ICAR institutes, SAUs, state agriculture departments, and private agencies. Our notable past events include:

- 1986 - National Seminar on Plant Protection in Field Crops.
- 1988 - National Workshop on Plant Protection in Horticultural Crops.
- 1992 – National Seminar on Changing Scenario in Pest and Pest Management.
- 1994 – National Workshop on use of Pheromones in Integrated Pest Management.
- 1995 – National Symposium on Integrated Pest Management and Environment.
- 1997 – National Seminar on Plant Protection Towards Sustainability.
- 2007 – National Conference on Organic Waste Utilization and Eco-Friendly Technologies For Crop Protection.
- 2012 – International Conference on Plant Health Management for Food Security.
- 2016 – National Conference on Plant Health Management.
- 2018 - Brain Storming Session on Emerging Plant Protection Technologies: Opportunities and Challenges.
- 2019 – Association in organizing “XIX International Plant Protection Congress” (IPPC2019).
- 2019 – Red Palm Weevil Symposium: Outsmarting the Red Palm Weevil: A Global Challenge (during IPPC2019).
- 2023 – International Conference on Plant Health Management – Innovation & sustainability (ICPHM 2023)
- 2024- Brain Storming Session on Integrated Pest Management of Invasive Black Thrips (*Thrips parvispinus*) in Chilli in Telangana and Andhra Pradesh.
- 2025 - A one-day seminar with Stakeholders on 17 April 2025. In Defence of Seed Sovereignty: Linking Community Seed Banks, Custodian Farmers, and Other Conservationists with the National Gene Bank.

International Conference on Plant Health Management - Innovation & Sustainability, ICPHM-2023

Recognizing Excellence: PPAI Awards

PPAI encourages and recognizes outstanding contributions to plant protection through various prestigious awards:

- **Dodla Raghava Reddy Memorial Award:** Biennial award for outstanding contributions in Plant Protection (Gold Medal + Certificate, from a fund of ₹3,00,000/-).
- **Dr. Bap Reddy Award for Integrated Pest Management:** Biennial award (Plaque, Certificate + Cash) for promoting IPM.
- **Fellows of Plant Protection Association of India:** Recognition for meritorious research and contributions after five years of continuous membership.
- **Smt. Kavuri Sarada Memorial Award for “The Best Research Paper”:** Awarded annually to authors of top research papers in IJPP.
- **Best Scientist Awards (Young & Senior Category):** Instituted in 2023, biannual awards (Citation, Certificate + Cash) for professional contributions in Entomology/Plant Pathology/Nematology, open to members up to 40 (Young) and 60 (Senior) years.

Reimagining Capacity: Addressing Tomorrow's Agricultural Imperatives

The landscape of Indian agriculture is constantly evolving, presenting new challenges and opportunities. From climate change impacts to the critical need for biodiversity conservation, a new generation of skilled professionals and empowered farmers is essential.

PPAI recognizes this imperative and is committed to **reviving and significantly expanding its capacity building programmes** to meet these contemporary demands. We aim to equip a new cohort of stakeholders with the knowledge and tools necessary for resilient and sustainable agricultural practices.

Why This Matters Now:

- **Food Security:** Ensuring sufficient and safe food for a growing population.
- **Environmental Resilience:** Adapting to climate change and promoting eco-friendly practices.
- **Farmer Empowerment:** Equipping farmers with skills to enhance productivity and income.
- **Biodiversity Protection:** Safeguarding India's invaluable genetic resources for future generations.

Our Expanded Horizon: Comprehensive Capacity Building Programs

PPAI is launching a new wave of structured capacity building initiatives tailored for a diverse range of stakeholders. Our renewed programs will focus on a holistic approach to plant health and sustainable agriculture, drawing upon our vast talent pool and the latest scientific advancements.

Diverse Stakeholders We Empower:

- **Farmers:** From tribal, underprivileged, and poor communities, including a special emphasis on **women farmers**.
- **Field Managers:** For public and private institutions, Farmer Producer Organizations (FPOs).
- **Industry Personnel:** Field workers and executives seeking advanced expertise.
- **NGO Professionals:** Equipping them to lead community-level agricultural development.
- **Students & Researchers:** Bridging academic knowledge with practical field application.

Key Programmatic Themes:

Our initiatives delve into critical areas, providing theoretical knowledge and hands-on practical experience:

- **Advanced Plant Health Management:** Integrated pest and disease management, biological control, diagnostics, and emerging threats.
- **Sustainable Agriculture Practices:** Organic farming, climate-smart agriculture, soil health management, and efficient resource utilization.
- **Conservation of Plant Genetic Resources (PGR):** Understanding the importance of genetic diversity, strategies for its preservation, and the establishment of gene banks.
- **In Situ and On-Farm Conservation of Genetic Diversity:** Empowering local communities and farmers in the active maintenance and evolution of stress resistant traditional landraces in their natural habitats.
- **Legal Frameworks in Genetic Resources:** Delving into the national and international protocols, policies, and laws governing plant genetic resources for food and agriculture (PGRFA), including the Convention on Biological Diversity (CBD) and the International Treaty on Plant Genetic Resources for Food and Agriculture (ITPGRFA).
- **Institutional Roles in Conservation, Utilization & Benefit Sharing:** Understanding the roles of various institutions (e.g., NBPGR, ICAR institutes, CGIAR centers) and the mechanisms for sustainable utilization and equitable benefit-sharing with conservator communities and traditional knowledge holders.

Partner with PPAI: Grow with Us!

The Plant Protection Association of India invites you to collaborate in this vital mission. Whether you are a farmer seeking knowledge, an Agricultural University or Research Institution, an industry leader aiming for sustainable practices, a policymaker shaping agricultural futures, or an organization committed to rural development, PPAI is your partner.

Join our journey to cultivate a healthier, wealthier, and more sustainable agricultural India.
